INTERTAPE POLYMER GROUP® INNOVATES WITH NEW RANDOM AUTO H2O SEMI-AUTOMATIC WATER-ACTIVATED CASE SEALER PROVIDING INCREASED THROUGHPUT

MONTREAL, QUEBEC and SARASOTA, FLORIDA (January 22, 2016) — Intertape Polymer Group® Inc. ("IPG®" or the "Company"), a leading manufacturer of packaging products and machinery, has launched its new Random Auto H2O Semi-Automatic Water-Activated Tape Case Sealer which allows operators faster box closures with the most secure tape closure method.

"This brand new innovative technology will allow our customers to automate in the fulfillment industry using water-activated tape as a premier packaging sealing system," states Joy Scott, Product Manager for Machinery. "This is a game changer for many of our customers who want the security and reliability of water-activated tape as a closure to protect their valuable products but need processing speeds of 10-12 cases per minute."

IPG developed the Random Auto H2O to fulfill the market's need for a low cost, low maintenance case sealer with high throughput speed. It is ideal for the fulfillment industry as this case sealer automatically adjusts to different sized RSC (Regular Slotted Containers) that need to be sealed at the end of the packaging line.

Similar to IPG's tabletop WAT taper, the Random Auto H2O also features a patent pending roller wetting technology which reduces maintenance to keep the wetting mechanism clean, evenly dispenses water across the tape, and has rollers that will not support the growth of bacteria or mold.

For more information regarding the Random Auto H2O WAT Case Sealer or other case sealing machines, please contact Joy Scott at jbscott@itape.com.

About Intertape Polymer Group® Inc.

Intertape Polymer Group® Inc. is a recognized leader in the development, manufacture and sale of a variety of paper and film based pressure-sensitive and water-activated tapes, polyethylene and specialized polyolefin films, woven coated fabrics and complementary packaging systems for industrial and retail use. Headquartered in Montreal, Quebec and Sarasota, Florida, the Company employs approximately 2,000 employees with operations in 17 locations, including 12 manufacturing facilities in North America and one in Europe.
