## **INTERTAPE POLYMER GROUP® UNVEILS TWO NEW ALUMINUM FOIL TAPES**

MONTREAL, QUEBEC and BRADENTON, FLORIDA (January 26, 2011) — Intertape Polymer Group® Inc. ("Intertape", "IPG" or the "Company") is pleased to announce the addition of two new products to their foil tape product offering.

Intertape® brand ALF201L is a 2 mil foil designed primarily for HVAC applications. The development of this product has been focused on producing a finished product that supports both the rigid duct and flexible duct application requirements through a dual certification conforming to UL181Ap and UL181Bfx.

"IPG is pleased to have been able to develop Intertape® brand ALF201L series with the application features desired by the actual users of this product," stated Lisa Nalette, IPG Industrial Tapes Product Manager. "The development of the product has been focused on meeting the specific needs of the customers and the performance demands of the HVAC market segment. Additionally, the dual certifications allow us to support both flexible and rigid duct HVAC criteria for building codes throughout the US. It also helps reduce inventory requirements for our distributor community."

The second line extension, Intertape® brand ALF175L, is being launched to fill the need for a UL723 (ASTM E84) rated multi-purpose foil tape. This product was designed to give exceptional performance where use of a thinner gauge foil base material is acceptable for the application.

Throughout the research and development of both ALF201L and ALF175L, a great deal of application consideration and testing went into final design. These products exhibit excellent performance and ease of use in all-weather applications where cold, hot and environmentally challenging conditions exist.

These two new products now complement the existing line of Intertape® brand ALF150L, ALF200, ALF200L, ALF300 and ALF300L, FSK1 and ASJ1 aluminum foil tapes.
