# RIPCORD™

## A KNIFE-FREE PACKAGING SOLUTION

Utility knives and box cutters are common in today's workplace, often leading to employee injuries, missed days of work, expensive claims and product damage.

- On average, employees miss 3 to 4 days away from work due to laceration injuries\*
- It is estimated that more than \$35,000 worth of healthcare, worker's compensation and loss in productivity can be attributed to just one cut or laceration to the hand\*
- Roughly 15 billion dollars annually are lost due to product damage†

IPG® introduces RipCord™ — a technology that requires no cutting tools. RipCord™ protects the user and the valuable content of your packages! Innovative tape head technology works in conjunction with a case sealing machine, applying cord under the carton sealing tape during the taping cycle, and leaving a tab for fast, safe access to the package contents.

\*Bureau of Labor Statistics - Case and Demographic Characteristics for Work-related Injuries and Illnesses Involving Days Away From Work (2012)  
†2012 FMI/GMA

Cord applied with tape as the carton is sealed

### FEATURES & BENEFITS

- Highly visible, striped pull cord replaces knives and box cutters for easy case opening
- RipCord™ reduces employee injury and product damage
- Quick and easy to add to a wide variety of case sealing machines
- Tamper evident
