PRODUCT INSTRUCTIONS

Should only be applied to clean, dry, thoroughly cured surfaces. If surfaces are dirty, wash and dry before applying plastic sheeting.

NOTE: Do not apply to wet or dirty vehicles or finishes that are not fully cured.

1. Ensure application surface is clean and dry
2. Apply plastic sheeting film to intended surface
3. Tape down all perimeters. Masking tape is suggested for this, but not required
4. Cut / trim film to fit desired area
5. Remove film from application area (carefully) once job is done
